What will I learn?

This course will help you understand:

- a range of sciences, including biology, chemistry and physics, and how they are relevant to us .
- science skills so that you can test ideas, complete experiments carefully and safely and then consider how correct and sensible the results are.

How will I learn?

You will have bilingual lessons carried out in a science laboratory. There will be 6 science lessons a week in year 10 and 11; 2 Biology lessons, 2 Chemistry lessons and 2 Physics lessons by 3 different teachers. You will be taught scientific theory across all 3 aspects, in addition to experiencing practical tasks.

How will I be assessed?

There will be 3 GCSE exams in the summer of Year 10, (Unit 1 – Biology, Unit 2 – Chemistry and Unit 3 – Physics) which correspond to **42.9%** of the whole GCSE (14.3% for each science). Two practical assessments (Unit 7) will be held in the Spring Term of Year 11 (**10%** of the GCSE). 3 more exams will be held in the Summer of Year 11, (Unit 4 – Biology, Unit 5 – Chemistry and Unit 6 – Physics) which correspond to **47.1%** of the whole GCSE – 15.7% for each science).

What will I need?

You will be required to attend all lessons with a complete set of **writing instruments**, and a **calculator**.

What happens after this course?
